

Fat On The Farm®

By segregating our raw material and blending it by fatty acid compositions, our Fat On The Farm program provides you with quality, cost-effective feeding fat.

Griffin's Fat On The Farm brings the benefits of feeding fats to the small to mid-size farmer. We supply a safe and easy to use heating and storage tank at no capital cost to the farm.

Benefits for Cows

- Increased energy intake without increased feed consumption
- Increased energy efficiency (more efficiency than adipose fat or carbohydrates)
- Improved health (decreases incidence of rumen acidosis, feet abscess and ulcers)
- Aids in production of a more uniformly mixed ration by acting as a binder
- Improved body condition with less stress and improved health
- Improved conception rates
- Less weight loss during lactation
- Increases milk production
- Higher survival rates for young

Benefits for Swine

- Improved conception rates
- Less stress and improved health
- A breeding stock in better condition
- Increased survival rate
- Heavier pigs at weaning
- Improved feed conversions
- Greatly reduces dust
- Reduced feed consumption and time to market
